Profile

Aspiring **DevOps & Cloud Engineer** with hands-on experience in **Azure cloud services**, CI/CD pipeline automation, containerization, and infrastructure management. Currently gaining enterprise DevOps exposure through an internship at **Cognizant**. A **quick learner** with strong **logical thinking** and problem-solving abilities—comfortable picking up new tools rapidly and turning complex technical challenges into reliable, scalable solutions.

Experience

Cognizant Technology Solutions

Hyderabad, India

Intern – Cloud-Native Application & Infrastructure Platform (CNAIP)

Jan 2026 – May 2026

- Built and executed end-to-end **CI/CD pipelines** using **Azure DevOps** and **Jenkins**, automating build, test, and release stages with Git-based source control.
- Containerized applications with **Docker** and orchestrated deployments on **Kubernetes**—configuring pods, services, rolling updates, and auto-scaling policies.
- Worked in **Linux** environments writing shell scripts for task automation, log monitoring, and system health checks.
- Completed **Microsoft Azure Fundamentals** training covering compute, storage, networking, IAM/RBAC, and resource governance. Applied **logical debugging** to trace pipeline failures and container issues systematically.

Projects

Azure-Based CI/CD Pipeline with Monitoring

Azure DevOps, Docker, Kubernetes, Azure Monitor, Git

- Implemented a full **CI/CD pipeline** on **Azure DevOps** — automated Git-triggered builds, Docker image creation via **Azure Container Registry (ACR)**, and deployment to a Kubernetes cluster.
- Configured **Azure Monitor** with alerting rules to track pod health, resource utilization, and deployment status for proactive incident detection.
- Structured the pipeline in modular stages using **logical thinking**—making individual steps easy to debug and the overall workflow extensible across dev/staging/prod environments.

Zomato Restaurant Data Analysis

Python, Pandas, Seaborn, Jupyter

- Performed end-to-end EDA on a real-world Zomato dataset—cleaning, missing-value handling, categorical standardization, and feature engineering.
- Surfaced actionable insights (e.g., online-ordering restaurants trend toward higher ratings) using heatmaps, box plots, and correlation matrices—demonstrating structured analytical thinking.

Technical Skills

- **Cloud & Azure:** Microsoft Azure (Compute, Storage, Networking, IAM/RBAC), Azure DevOps, Azure Monitor, Azure Container Registry (ACR), Azure Fundamentals (AZ-900)
- **DevOps & Infra:** Jenkins, Docker, Kubernetes, CI/CD Pipelines, Git/GitHub, Shell Scripting, Linux Administration
- **Languages:** Python, Java, SQL, C **Web:** HTML/CSS, REST APIs, React (beginner) **DB:** MySQL
- **Data & Tooling:** Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook
- **CS Foundations:** Data Structures & Algorithms, OOP, OS, DBMS, Computer Networks, System Design basics
- **Soft Skills:** Quick Learner, Logical & Analytical Thinking, Team Collaboration, Attention to Detail

Education

Sreenidhi Institute of Science and Technology

Hyderabad, India

B.Tech in Information Technology – CGPA: 7.40

Expected 2026

Narayana Junior College

Hyderabad, India

Intermediate (MPC)

2020 – 2022

Ramadevi Public School

Hyderabad, India

Secondary School (ICSE)

Completed 2020

Certifications & Continuous Learning

- **Microsoft Azure Fundamentals (AZ-900)** – In progress; actively studying advanced Kubernetes, Azure Bicep/Terraform, and DevSecOps practices.
- Demonstrated ability to **quickly learn** new cloud tools and frameworks on the job with minimal ramp-up time.
