Profile

Aspiring **Full Stack AI Engineer** with hands-on exposure to cloud-native development, DevOps on Azure, and Python-based AI/data tooling. Currently interning at Cognizant on the **CNAIP** track and building RAG applications using LLM APIs and vector databases. Quick learner who enjoys taking ideas from prototype to production.

Experience

Cognizant Technology Solutions

Hyderabad, India

Intern – Cloud-Native Application & Infrastructure Platform (CNAIP)

Jan 2026 – May 2026

- Built and ran **CI/CD pipelines** using **Azure DevOps** and **Jenkins** to automate build, test, and release workflows with Git-based source control.
- Containerized applications with **Docker** and orchestrated multi-service deployments on **Kubernetes**—pods, deployments, services, and scaling.
- Worked in **Linux** environments using shell scripting and CLI tooling for development, debugging, and basic system administration.
- Completed **Azure Fundamentals** coursework covering core compute, storage, networking, identity (IAM), and resource management services.

Projects

TS EAMCET College Recommender – RAG Application

Python, Gemini API, LanceDB, Hugging Face, Pandas

- Built a domain-specific **Retrieval-Augmented Generation (RAG)** system that helps TS EAMCET aspirants discover engineering colleges based on rank, category (caste/gender), and locality.
- Collected and consolidated **5 years** of TS EAMCET last-rank cutoff data across categories, branches, and colleges; preprocessed inconsistent labels and normalized records into a clean knowledge base.
- Generated semantic embeddings using **Hugging Face** sentence-transformer models and indexed them in **LanceDB** for fast vector similarity search.
- Integrated the **Google Gemini API** with retrieval grounding to produce hallucination-resistant answers covering eligible colleges, 5-year cutoff trends, and locality-aware recommendations.

Zomato Restaurant Data Analysis

Python, Pandas, Seaborn, Jupyter

- Performed end-to-end EDA on a real-world Zomato dataset—data cleaning, missing-value handling, categorical standardization, and feature engineering.
- Built visual analytics on cuisine frequency, rating-vs-cost trends, and delivery patterns using heatmaps, box plots, and correlation matrices.
- Surfaced insights such as: restaurants offering online ordering trend toward higher ratings; North Indian and Chinese cuisines dominate demand.

Technical Skills

- **Cloud & DevOps:** Microsoft Azure, Azure DevOps, Jenkins, Docker, Kubernetes, Linux, Git/GitHub, CI/CD
- **AI / Data:** Gemini API, RAG, Hugging Face embeddings, LanceDB, Pandas, NumPy, Matplotlib, Seaborn, Jupyter
- **Languages:** Python, Java, SQL, C **DB:** MySQL
- **CS Foundations:** Data Structures & Algorithms, OOP, OS, DBMS, Computer Networks, System Design basics

Education

Sreenidhi Institute of Science and Technology

Hyderabad, India

B.Tech in Information Technology – CGPA: 7.40

Expected 2026

Narayana Junior College

Hyderabad, India

Intermediate (MPC)

2020 – 2022

Ramadevi Public School

Hyderabad, India

Secondary School (ICSE)

Completed 2020

Certifications & Continuous Learning

- Microsoft Azure Fundamentals (in progress, via Cognizant CNAIP training).
- Currently exploring LLM application development, agentic AI frameworks, and advanced RAG techniques.
